TYFOON TYRES

THE 5 CERTAINTIES OF TYFOON

- A STRONG DUTCH BRAND WITH MORE THAN 25 YEARS OF EXPERIENCE
- PRODUCED BY GERMANY'S LARGEST TYRE MANUFACTURER*
- EXCELLENT PRICE & QUALITY VALUE
- GUARANTEES SAFE DRIVING BEHAVIOUR IN ALL WEATHER CONDITIONS
- OFFERS AN IMPRESSIVE MILEAGE

* WITH THE EXCEPTION OF A NUMBER OF PROFILES

SUCCESSOR 7

13" to 19" 

The Successor 7 is the new summer tyre, specially developed for all types of passenger cars. This profile stands for sportiness, safety, low rolling resistance and noise in maximum balance! This tyre has been designed on the basis of the latest German technological developments in the field of tyres. The tyre is characterised by very stable and safe handling on wet and dry roads. The rubber compound and the renewed, stiff tread design ensure long-lasting driving pleasure at a high level. This new top model from Tyfoon also has excellent label values. The Successor 7 is the alternative to the established A-brands at an attractive price.

SUCCESSOR 6

16", 17", 19" & 20"

The Tyfoon Successor 6 is a high performance summer tyre for passenger cars in the middle and top segment. The Successor 6 is the ideal tyre for sporty and active riders. This summer tyre combines speed, control, reliable handling and comfort. In sudden (evasive) maneuvers, the car remains in control, even on wet roads.

CONNEXION 5

13" to 15" 

The Connexion 5 is a sporty tire for the middle segment. When developing the Connexion 5, the optimum combination between tire construction, rubber composition and profile design was carefully considered. This guarantees you a high-performance tire with reliable driving and braking characteristics with a competitive price-quality ratio.

CONNEXION 3

10" to 13", 15" & 16"

The Tyfoon Connexion 3 is a solid summer tyre for smaller family cars and passenger cars in the middle segment. Optimal road holding and excellent performance on dry and wet surfaces; you can rely on the Connexion 3.

CONNEXION II

13" & 14" 

The Tyfoon Connexion II has been developed for compact class vehicles. With these tires you are assured of predictable driving behaviour and overall performance. With the Connexion II you have excellent driving and braking characteristics under all circumstances. The tire structure and the profile design guarantee optimum grip and reliable handling in various weather conditions.

HEAVY DUTY 3

15" & 16"

The Tyfoon Heavy Duty 3 is a robust summer tyre for vans. Thanks to its advanced tread design, reinforced tyre build-up and solid shoulders, this van tyre delivers reliable performance. This tyre comes into its own during heavier transport.

HEAVY DUTY 4

14" to 16" 

The completely newly developed Heavy Duty 4 is based on an extra heavy tyre construction. The improved rubber compound makes the Heavy Duty 4 extremely reliable and safe. The basis of the renewed tread is formed by three continuous tread bars. The robust tread blocks have slanted, widthwise tread grooves that efficiently channel water and dirt to the side of the tyre. This greatly reduces the risk of aquaplaning. The wide tread blocks on the tyre shoulder ensure stable driving behaviour. The optimum grip and short braking distance provide more safety, and despite its robust construction, the tyre feels very comfortable, certainly for a Heavy Duty version.

HEAVY DUTY II

14" to 16" 

The Tyfoon Heavy Duty II has an extra high carrying capacity and has been specially developed for the heavier work. The stiff rubber composition in combination with extra construction rigidity ensures driving behaviour remains predictable and the road holding optimum even under maximum load.

4-SEASON

13" to 17"  

All-season tires are a well-considered mix between summer and winter tires. The rubber compound is a mix of summer and winter properties. Thanks to the special rubber composition and the structure of the tread, All-season tires perform well in the summer and also have better road holding and more grip when driving on snow or on a wet road in the winter.

ALL-SEASON 6

14" to 18" 

The Tyfoon All-Season 6 has a high-end rubber compound resulting in a good combination of summer and winter properties in one tire. The tire maintains proper driving and braking characteristics at all temperatures, providing reliable performance all year round. In the summer months the All-Season 6 feels firm with convincing driving performance, at temperatures below 7 degrees the tire is smooth and maintains its grip.

ALL-SEASON 6 VAN

15" & 16" 

The Tyfoon All-season 6 VAN is Tyfoon's latest all-season tire, specially developed for transport and delivery vehicles. The weighted and extra reinforced tire construction provides higher load capacity and good performance at high speeds. The all-season tread, with 3 continuous longitudinal grooves and width grooves running to the side, ensures good grip in all weather conditions and minimizes the risk of aquaplaning. The All-season Van 6 has a 3-PMSF certification and thus meets the applicable European regulations for winter tires.

VAN 4-SEASON

15" & 16"  

The Tyfoon Van 4-Season is Tyfoon's newest all-season tyre, specially developed for vans. The extra reinforced tyre construction forms the basis of this version. The all-season profile, with 3 continuous longitudinal grooves and the side continuous width grooves, generate maximum grip in all weather conditions and minimize the risk of aquaplaning. The wide, sloping, robust tread blocks on the shoulder of the tire provide extra stability. Even with sudden evasion and / or extreme braking. The tyres have the 3-PMSF certification (3 Peak Mountain Snowflake) and thus meet the applicable European regulations for winter tyres.

EUROSNOW 3

14" to 18"

The Tyfoon Eurosnow 3 is the safe choice for the winter season due to its excellent driving characteristics in wintry conditions. The Eurosnow 3 guarantees a comfortable and safe ride, even on a wet road surface. Thanks to a newly developed special rubber compound, the Eurosnow 3 combines maximum grip with favourable fuel consumption in all conditions.

WINTER TRANSPORT 3

15" & 16"

This powerhouse is the ideal commercial vehicle tyre for a comfortable and safe ride in wintry conditions. The Winter Transport 3 has an open tread and thanks to the special rubber compound the tyre remains supple at low temperatures, despite the extra reinforcements. This maintains grip on snowy or wet surfaces and the braking distance will be considerably shorter.
